EDUCATION

Full-Stack Web Developer Bootcamp

November 2021 – February 2022

Instructor: Colt Steele

HTML, CSS, JavaScript, Node, MongoDB, Express, Bootstrap

University of North Carolina Wilmington

August 2016 - May 2020

Cameron School of Business

B.S. Business Administration – Concentration: Finance

The University of Notre Dame Australia

January 2019

Study Abroad Program: International Business

TECHNICAL SKILLS

- Languages: Typescript, Javascript, HTML, CSS, Python, Java, Excel VBA
- Frameworks/Libraries: Nextjs, React, Node, Express, Prisma, Mongoose, React-Spring, Tailwind, Bootstrap
- Developer Tools: VS Code, CLI, Git, Unix, Docker, AWS, Jest, Cypress

EXPERIENCE

Warren Lotas

December 2022 – February 2023

- Developed web pages for the Shopify site of a clothing company
- Leveraged knowledge of web development and Shopify to create custom, responsive web pages

Loving Wellness Chiropractic

September – November 2022

- Commissioned single page web application for a local chiropractic business
- Utilized React and Tailwind for the front-end and Node and Express for the back-end
- Showcases the services the business offers, testimonials from customers, and includes a contact form for potential customers

PROJECTS

Mock Market

January – March 2023

- Designed and developed a fully functional web application that mimicks a stock exchange using the Next.js framework
- Implemented real-time stock prices using the Finnhub API and stored user's trades in a Postgre database using Prisma
- Designed and developed the application's user interface using Tailwind CSS
- Utilized TypeScript to ensure type safety and improve code quality
- Successfully deployed the application on Vercel for public use

Cook the Books

March – July 2022

- Sports betting arbitrage calculator that showcases arbitrage opportunities in real-time
- Users can find opportunities to bet on both sides of the game and make a risk free return
- Aggregates the odds of sports games from over 15+ different sportsbooks to calculate and find opportunities for users to arbitrage the bets and profit over 45%
- Built using the MERN tech stack (MongoDB, Express, React, Node) and Tailwind CSS
 - Cloudinary & Heroku used for photo and web hosting
 - Utilized MongoDB to save arbitrage opportunities over a specific threshold in a database

Yelp Camp

January – March 2022

- Created a full-stack web application to post and review campgrounds
- Users can post campgrounds they have visited, view other campgrounds, and leave reviews
- Implemented user authentication to allow users to create accounts and login/logout
- Tech stack for this project included Javascript, Node, MongoDB, Express, and Bootstrap

Copy Tweet

June – August 2021

- Built a Twitter bot to automatically send out the same tweets as a target user
- Uses the python library, Tweepy, to interact with the Twitter API for reading/sending tweets and deta.sh to run the program on a set schedule

ADDITIONAL INFORMATION

- Community Service/Leadership: Winterpark Elementary School Big Brother, Alpha Sigma Phi Recruitment Director
- Interests: Long-distance running, travel & video games
